Endangered Plant Transplant Permit Application Procedures

All transplant projects on federal, state, and private lands require a permit from the EMNRD – Forestry Division (unless the transplant project is carried out by a federal employee on federal lands). Transplant permit applications for state listed endangered plants must contain the following information:

- Name of the person performing the transplant (permittee)
- Qualifications of permittee to perform the transplant
- Name and location of the proposed project
- Proposed transplant timeframe
- Survey report, including a map
- Number of plants found during surveys, number of plants to be transplanted, number of plants impacted by project footprint.
- Mitigation measures implemented to avoid impacts
- Location of transplant site
- Transplant protocol (for Brack's cactus, provided by the BLM)
- Monitoring plan (for Brack's cactus, provided by the BLM)

All Brack's cactus transplant permits are contingent on approval by the BLM NM State Office.

Mail or email permit applications to:

Daniela Roth
Endangered Plant Program Coordinator
EMNRD – Forestry Division
1220 S. St. Francis Drive
Santa Fe, NM 87505
Daniela.Roth@state.nm.us

Please contact Daniela Roth if you have additional questions (505-476-3347).
