Dear Ms Roth-

I write these comments as a private citizen. I support the addition of *Sclerocactus cloverae* (SCLCLO), *Linum allredii* (LINALL), *Townsendia gypsophilia* (TOWGYP) to the 19.21.2 NMAC, Endangered Plant Species List and Collection Permits. SCLCLO is a rare species and threats of anthropogenic disturbances, herbivory, climate change, etc are a significant concern. LINALL and TOWGYP are both extremely rare and have very limited suitable habitats. These plants require more protection as their rare habitat are threatened by anthropogenic disturbances.

I also support the state listing of and *Cymopterus spellenbergii* as it has a very limited habitat.

Thank you,  
Zoe Davidson
