New Mexico State Parks Division

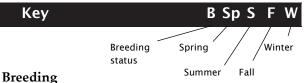

Coyote Creek State Park

Birds of Coyote Creek

Situated along a meandering stream, Coyote Creek State Park is nestled in the scenic Sangre de Cristo Mountains at an elevation of 7,667 feet. The small, lush creek valley is a good spot to see flycatchers and warblers in the summer. A park trail takes hikers through a forest of spruce and pine.

This checklist provides information on birds you are likely to encounter at Coyote Creek State Park. The checklist has been compiled using data from eBird. Birders are encouraged to log their sightings at eBird.org to help improve the list in the future. The list for Coyote Creek includes 131 species.

B - Breeding status

+ - Breeds in Mora County, New Mexico.

Seasons

- Sp Spring (March 1–May 31)
- S Summer (June 1-August 31)
- F Fall (September 1–November 30)
- W Winter (December–February 28)

Abundance

c - Common. Present in the proper habitat and season.

fc - Frequently common. Often present in the proper habitat and season.

u - Uncommon. Occasionally present in the proper habitat and season.

r - Rare. Seldom present in suitable habitat; few records.
